## MANHOLE COVER LIFTERS

Please call for prices or have a look at the additional resources in our [customer area](#).

### Handylift Swinger

The super small Handylift Swinger is a new concept in lifters. It will fit in almost any car boot and as it weighs only 17kg even the most 'petite' engineer can use it. Despite its small size it is no weakling – it develops a tonne of lift – and it can tackle stuck covers with ease.

The Handylift Swinger comes in two sizes:

The basic Handylift Swinger unit is primarily designed for 600 x 600mm clear opening 2-keyhole sewer covers, and comes with a pair of lifting keys.

The Handylift Swinger XL is simply a larger version of the standard unit. As such it can tackle covers up to 870 x 870mm keyspan, and again comes complete with a pair of keys.

You can find a wealth of information on our lifter range over at our customer area. Available info includes product brochures, operational videos, instructions, and our Cover Selector tool to help you choose the right kit for your covers.

Model name:	Handylift Swinger
