Handylift Hydraulic

The Handylift Hydraulic is the best selling lifter on the market. It's light and easy to use. With a breakout force of 1.5 tonnes it will enable anyone to lift stuck covers without effort. It is Proteus' most versatile lifter, capable of lifting all types of covers with the relevant keys and accessories.

One of the important things to remember for UK-based purchasers is that with a Handylift Hydraulic you will be fulfilling your obligations under the Manual Handling Operations Regulations 1992. We supply our lifters to all major UK utility companies, councils, and thousands of other companies.

This machine can be carried completely assembled in a van or large car boot. It can also be disassembled easily in 15 seconds to fit in smaller spaces.

The Handylift Hydraulic comes in two sizes:

The basic Handylift Hydraulic will lift covers up to 900mm x 900mm keyspan, and with the right array of keys can tackle 2-keyhole covers, double-triangle covers, and 4-keyhole covers.

The Handylift Texas Hydraulic is a larger version of the standard unit and can lift covers up to 1200mm x 1200mm keyspan as standard.

You can find a wealth of information on our lifter range over at our customer area. Available info includes product brochures, operational videos, instructions, and our Cover Selector tool to help you choose the right kit for your covers.
